HANLEY UNGLAZED FLOOR AND WALL TILE

The Hanley Company, long recognized in the field of burned clay and shale building materials, operates three modern factories producing distinctive types of unglazed floor and wall tile shown in this catalog, and a complete line of glazed double and triple structural units, hollow building tile, enameled, glazed and face brick. These are illustrated in Sweet's Architectural Catalog (refer to manufacturers Index).

Hanley unglazed floor and wall tiles are manufactured from skillfully blended select natural clays and shales, formed in a plastic state and specially burned at exceedingly high temperatures, to produce various natural rich colors in five different types of hard-burned vitreous tile.

HANLEY FLAME-TINTED TILE:—Distinctive for their gradually blended varying soft tones of color, smooth-textured surface and slightly rounded edges, giving a hand-made appearance, without increasing setting cost. Each color range is divided into three shades so that any combinations of individual shades or colors may be had in any pattern or treatment. All tile are supplied with slightly rounded (fettled) edges, unless square edges are specified.

HANLEY EVEN-TONE TILE:—Made from the same selected blends of natural clays and shales as Flame-Tinted tile, but burned by a different method to produce an even tone of rich color throughout the surface and body. A slight variation of shade in the full range adds interest to the pattern. Slightly rounded or square edges may be obtained in this type.

HANLEY RED QUARRY TILE:—Rich cherry-red hard-burned Bradford shale tile, having not more than 1/10 of 1% absorption and a very smooth, easily cleaned surface. They are particularly appropriate for locations demanding durability, cleanliness and attractiveness. Tests of every description performed by reputable laboratories and actual service have proven the superiority of Hanley Quarry Tile. Perfected-grade quarry tile (ground on four sides) may be laid with as narrow as 3/16" joints. Tile may be obtained with smooth or non-skid (diamond-mesh) surface.

HANLEY CERAMIC TILE:—Distinctively different rich natural colors, and slight irregularities in size, add interest and attractiveness at lower cost. The hard-burned vitreous clay and shale bodies are resistant to stains and chemicals and withstand severe wear. Cushion edge tile are made only in sizes of 2x2, 4x2 and 4x4. Square edge tile are made in all sizes. All 4x4 ceramics have grooved backs to increase the bond and reduce the cost of setting. All sizes may be obtained loose or mounted on paper in patterns desired.

HANLEY DUTI-TILE:—(Packing House Tile)—Designed for use in dairies, packing houses, etc., where a super-durable, ultra-sanitary floor is demanded which will withstand the food acids and severe use to which they are subjected. Absorption does not exceed 1/10 of 1% and tile may be laid with a 1/8" joint thereby increasing sanitation. Smooth or non-skid (Diamond Mesh) surface and grooved or scratch-bottom may be obtained. The thickness of the grooved bottom tile is 1 3/8" and the scratch-bottom tile is 1 1/4".

HANLEY GLAZED INSERTS:—Various designs are obtainable which add color and richness to floor and wall treatment. The relief surface of the design is glazed, the remainder of the tile being unglazed in varying shades of buff and brown.

GENERAL SPECIFICATION FOR INSTALLATION of HANLEY TILE

Furnish all labor and materials for the completion of all tile work. The "Basic Specification For Tile Work", last edition (K-300) as issued by the Tile Manufacturers Association, 19 W. 44th Street, New York City, is hereby made a part of this specification insofar as it is applicable.

All tile (give type of tile; Ceramic, Flame-Tinted, Even-tone or Quarry) to be standard grade as manufactured by the Hanley Co., Bradford, Pa. Refer to Hanley catalogue in Sweets Index for designs, color numbers, etc. Tile shall be provided in the following rooms or spaces, in sizes, designs, and colors as specified or detailed.

Names of rooms

Floor Field—Sizes (list sizes of tile) in Pattern No.

Colors—(List range or Shade No. as noted on Page 2.)

Floor Border—(Give colors and sizes)

Base—Tile for base to be cove base No. with necessary angles, stops and plinths in Hanley shade number

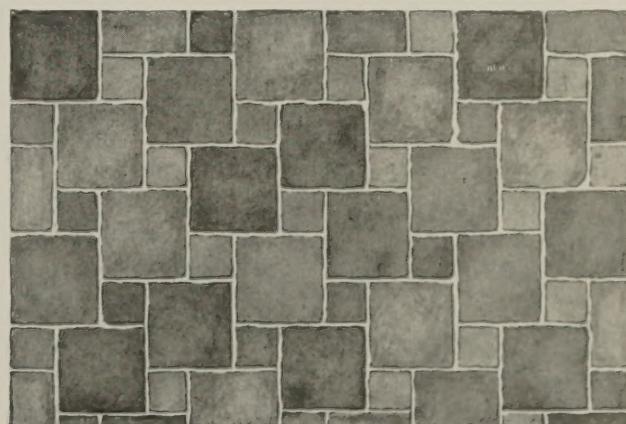

Wainscot—Provide all necessary tile and angles in sizes as detailed in the following shades (list shade numbers). Where no detail is shown, tile shall be laid [broken joint], [straight joint] or in Pattern No. in Hanley Tile Range (or Shade No.) Sizes Bullnose tiles with 3/4" radius to be used at all external corners and around all uncased openings.

Cap—Shall be (Give size, number and shade)

DESIGN No. 1009

Sizes: 6x6, 3x3

Colors: To be specified from chart Page 2

HANLEY UNGLAZED FLOOR AND WALL TILE

The Hanley Company, Leading Factors in the Field of Burned Clay and Shale Building Materials, operates three modern plants producing distinctive types of unglazed floor and wall tile shown herein and also a complete line of glazed structural units, enameled, glazed and face brick. These are shown in Sweets Architectural Catalogue (Refer to manufacturers' index).

Hanley unglazed floor and wall tiles are manufactured from skillfully blended selected natural clays and shales, formed in a plastic state and specially burned at exceedingly high temperatures, to produce various natural rich colors in five different types of hard-burned vitreous tile.

HANLEY FLAME-TINTED TILE: Distinctive for their gradually blended varying soft tones of color, smooth-textured surface and slightly rounded edges producing a hand-made effect. Each color range may be had in any pattern or treatment. All flame-tinted tile are furnished with slightly rounded (fettled) edges, unless square edges are specified.

HANLEY EVEN-TONE TILE: Made from the same selected blends of natural clays and shales as flame-tinted tile, but burned by a different method to produce an even tone of rich color throughout the body and surface. A slight variation of shade in the full range adds interest to the pattern. Slightly rounded or square edges may be obtained in this type of quarry tile.

HANLEY RED QUARRY TILE: A rich cherry - red hard-burned Bradford shale tile, having not more than $\frac{1}{2}$ of 1% absorption and a smooth easily cleaned surface. They are particularly appropriate for locations demanding durability, cleanliness and attractiveness. Tests of every description undertaken by reputable laboratories and actual service conditions have proven the superiority of Hanley quarry. Perfected grade quarry tile (ground on four sides) may be laid with very narrow joints. Tile may be obtained with smooth or non-skid (diamond mesh) surface. A complete line of bullnoses and sanitary base are available.

HANLEY CERAMIC TILE: Distinctively different rich natural and flashed colors add interest and attractiveness to this low cost material. The hard-burned vitreous clay and shale bodies are resistant to stains and chemicals and will withstand severe wear. Cushion edge tile are made only in sizes of 2x2, 4x2 and 4x4. All 4x4 ceramic have grooved backs to increase the setting bond. All sizes may be obtained loose or mounted on paper in patterns desired. Cove base and bull-nosed cap are also available for use as wall tile trimmers.

HANLEY DUTI-TILE: (Packing house tile). Specially developed for use in dairies, ice cream plants, packing and food preparation plants, chemical plants, etc., where a super-durable, extremely sanitary floor is demanded which will withstand acids and the severe use to which they are subjected. Absorption does not exceed $\frac{1}{2}$ of 1%. Size $8\frac{3}{8} \times 1\frac{3}{8}$ thick.

—DESCRIPTION OF GRADES—

PERFECTED—selected from standard grade and ground on all edges to exact dimensions, permitting installation with narrow string line joints. Only square edged tile obtainable in this grade.

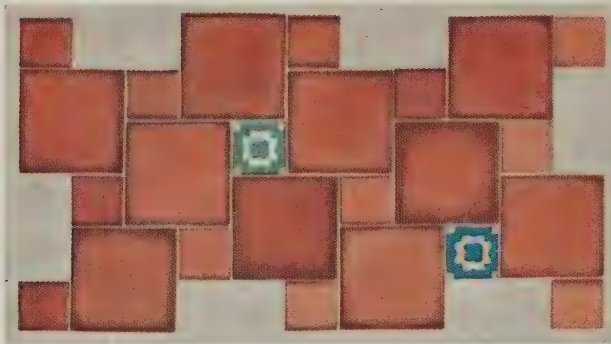

STANDARD—the best grade of tile from the kiln. Sound and solid, approximately level and regular in lines with only slight variations in lengths and widths. Sorted to shades designated.

SECONDS—rejected from standard grade due to imperfections consisting of slightly broken corners and chipped edges. There are no cracks running into the tiles. They are not selected with care as to level surface and regular lines.

RUBBLE RANDOM—irregular broken pieces in various standard colors, sizes and thicknesses.

HANLEY CERAMIC TILE COLORS AND DESIGNS

DESIGN NO. 2004 (Stagger)

DESIGN NO. 2004 (Stagger)

SIZES: 4x4, 2x2 ($\frac{3}{8}$ " Thick)
 COLORS: Shades C - 225 - 226
 DARK AUTUMN FLASHED
 REDDISH BROWN BLEND
 FETTLIED EDGES

This Pattern Shows the Flashing

in Hanley Ceramics to good advantage. The sewing room, sun parlor, game room, rumpus or recreation room are all vastly improved at low cost by the use of Hanley Fettle Edge Ceramic (all $\frac{3}{8}$ " thick).

To enhance the decorative value of these floors we are prepared to furnish 2x2 and 4x4 glazed inserts, consisting of light and dark shades of green and blue glaze, the latter applied to the depressed portions of the tile, while the raised portions are in varying shades of buff.

DESIGN NO. 1002 (Random)

Design No. 1002 (Random)

SIZES: 4x4, 4x2, 2x2 ($\frac{3}{8}$ " Thick)
 COLORS: Shade C - 210, Full Range of SALMON with a slight shade variation, FETTLIED EDGES

This Color Has Many Uses

due to its subdued nature and reasonable uniformity of smooth color and light reflection characteristics. An ideal wainscoting material where a glazed tile would not prove suitable. Fettle edges enhance the appearance of these tiles.

DESIGN NO. 2002

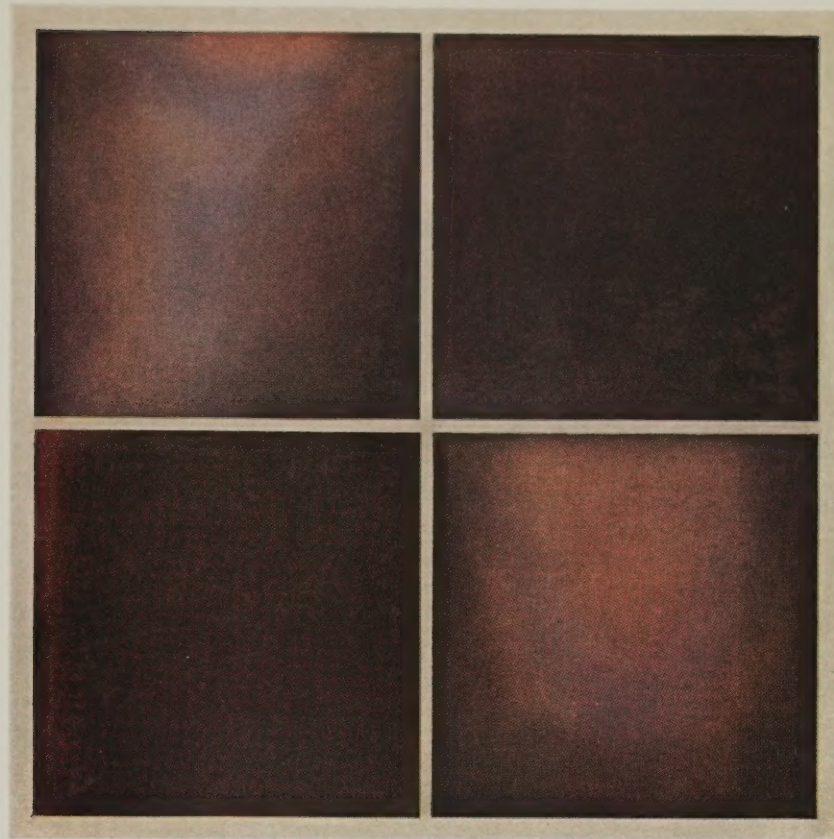

Design No. 2002

SIZES: 4x4, 4x2, 2x2 ($\frac{3}{8}$ " Thick)
 COLORS: Shade C - 10 - CHERRY RED - SQUARE EDGES.
 2x2— Shade - C - 6 - Varying Shades of GUN-METAL BLACK

Hanley Red Ceramic (Shade C-10)

is manufactured to secure a hard body, durable tile that is non-absorbent. These tile are vitreous by reason of their $\frac{1}{2}$ of 1% absorption. They are tile of exceptional merit and are adopted for use where a quarry tile would prove too heavy. A complete line of base, cap and bullnose will permit these tile to be used for wall surfaces where a durable wall finish is desirable. The color and quality of Henley Ceramics cannot be altered by time or the elements.

HANLEY FLAME TINTED QUARRY TILE

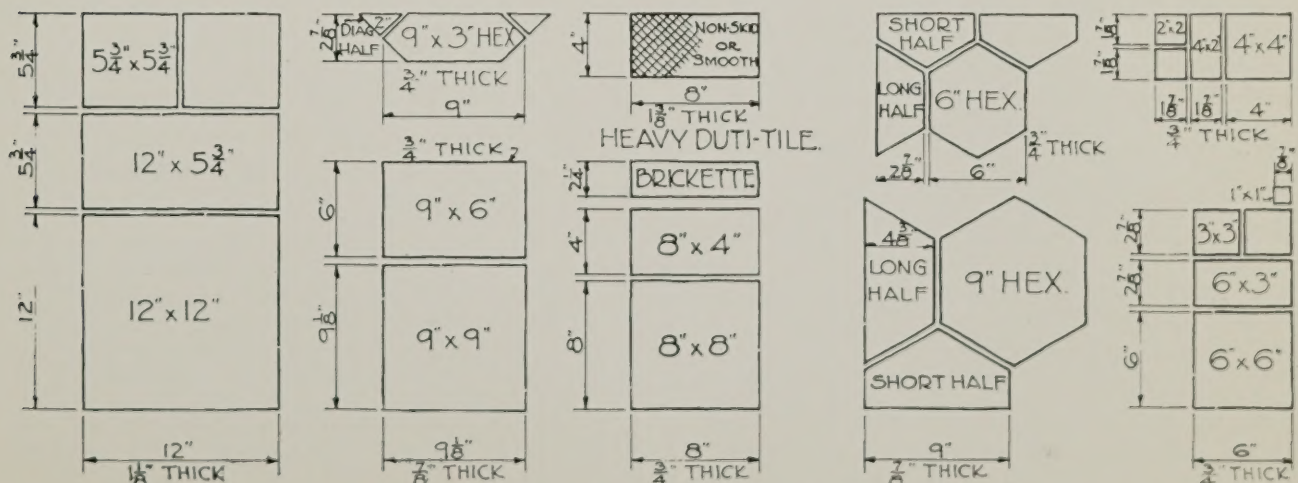

12" x 12" x 1 1/8"
SHADES 220 - 221 RANGE

A New Product Developed by Hanley — Flame-tinted 12x12x1 1/8 quarry tile in shades 220-221 full range. These tile have distinctive flashed gun-metal tones that would add charm and character to residential entrances and stair halls.

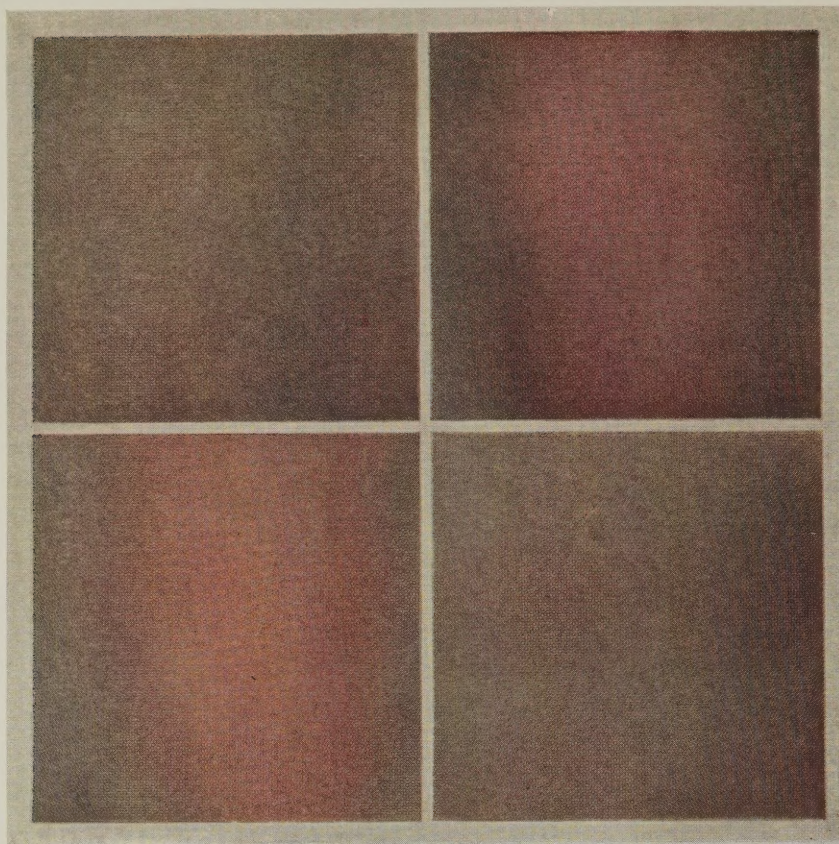

They are also perfectly adopted to outdoor uses for terraces, sidewalks, approaches or as garden stepping stones. In the latter case they may be set directly on a shallow sand bed.

DIAGRAM OF STANDARD SIZES AND SHAPES

Diagonal halves obtainable in all square tile sizes, except 1x1. Tile may vary slightly from actual dimensions given.

HANLEY FLAME TINTED QUARRY TILE

12" x 12" x 1 1/8"
SHADES 120 - 121 RANGE

A pleasing Grey-Green Flashed range of shades, suggestive of early autumn colors in unusual tones of soft greens, blending into warm reddish shades. These tile are particularly attractive for laundries,

game rooms, etc., as well as for exterior terraces, promenades, roof gardens, and for garden walks or swimming pool approaches and surrounding areas. A truly fine product worthy of dignified surroundings.

GENERAL SPECIFICATION FOR INSTALLATION OF HANLEY TILE

Furnish all labor and materials for the completion of all tile work. The "Basic Specification for Tile Work", 1937 edition (K-300) as issued by the Tile Manufacturers Association, 19 W. 44th Street, New York City, is hereby made a part of this specification insofar as it is applicable.

All tile (give type of tile; Ceramic, Flame-Tinted, Eventone or Quarry) to be standard grade as manufactured by the Hanley Co., Bradford, Pa. Refer to Hanley catalogue for designs, color numbers, etc. Tile shall be provided in the following rooms or spaces, in sizes, designs, and colors as specified or detailed.

Names of rooms.....

Floor Field—Sizes (list sizes of tile) in Pattern No.....

Colors—(List range or Shade Numbers).

Floor Border—(Give colors and sizes).....

Base—Tile for base to be cove base No..... with necessary angles, stops and plinths in Hanley shade number.....

Wainscoat—Provide all necessary tile and angles in sizes as detailed in the following shades (list shade numbers). Where no detail is shown, tile shall be laid (broken joint), (straight joint) or in Pattern No.....in Hanley Tile Range (or Shade No.)..... Sizes..... Bullnose tiles with 3/4" radius to be used at all external corners and around all uncased openings.

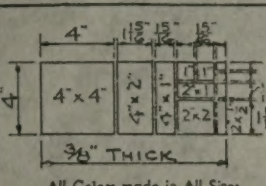

Cap—Shall be (Give size, number and shade).....

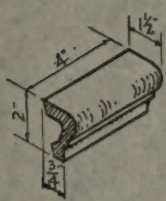

Where unusual construction conditions or special uses may require specific methods and materials for setting, we are prepared to furnish specifications for such purposes. Our consultants are at the service of architects, engineers and contractors.

Hanley Red Quarries, Shade 10, are designed for utility as well as decorative purposes in and about the home. Porches, sun decks, terraces, etc., all lend themselves to the use of these tile which are impervious to extremes of weather. Tile base, bullnoses, stair treads, and threshold tile are available.
